REMARKS

At the outset, the Examiner is thanked for the thorough review and consideration of the pending application. The non-final Office Action dated February 27, 2007 has been received and its contents carefully reviewed.

Claims 128 and 130 are hereby amended; claims 120-127 are hereby canceled; claims 155-156 are hereby added. Accordingly, claims 56-63, 65-76 and 78-119, 128-132, 141-145, and 150-156 are currently pending. Reexamination and reconsideration of the pending claims is respectfully requested.

Applicants believe the foregoing amendments place the application in condition for allowance and early, favorable action is respectfully solicited. Claims 155-156 are ultimately dependent upon allowable claims 128 and 141, respectively. Therefore, Applicants submit that these claims are allowable.

For the Examiner's information, we enclose copies of Office Actions from co-pending related U.S. Patent Application Nos. 11/096,080 and 11/096,079 and a Notice of Allowance from co-pending related U.S. Patent Application No. 10/787,933, all of which are being examined by Examiner Yean Hsi Chang in Art Unit 2835.

If for any reason the Examiner finds the application other than in condition for allowance, the Examiner is requested to call the undersigned attorney at (202) 496-7500 to discuss the steps necessary for placing the application in condition for allowance. All correspondence should continue to be sent to the below-listed address.

If these papers are not considered timely filed by the Patent and Trademark Office, then a petition is hereby made under 37 C.F.R. §1.136, and any additional fees required under 37 C.F.R. §1.136 for any necessary extension of time, or any other fees required to complete the filing of this response, may be charged to Deposit Account No. 50-0911. Please credit any overpayment to deposit Account No. 50-0911. A duplicate copy of this sheet is enclosed.

flat display panel, and wherein the flat display panel only mounts to the rear portion of the housing as set forth in claims 83, 95, 120, 131 and 147. Claims 85-88, 90-94 and 144-146 are dependent claims from claim 83; claims 96-101 are dependent claims from claim 95; claims 121 and 123-130 are dependent claims from claim 120; and claims 134-143, and 148-149 are dependent claims from claims 131 and 147, respectively.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 1/3/07 has been entered.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 56-69 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 83, 88 and 92-94 of copending Application No. 10/787,933. Although the conflicting claims are not identical, they are not patentably distinct from each other because same subject matters are claimed with some different terminologies, such as: a flat panel display device vs. a flat panel display apparatus, and a housing vs. a case.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

> (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5. Claims 56-69 are rejected under 35 U.S.C. 103(a) as being unpatentable over Toyoshima (JP 10-117313) in view of IBM color display (IBM 9516-A03), Yun et al. (US 5,835,139), and Mizutani (JP 9-190156).

Toyoshima teaches a flat panel display device (figure A) mounted to a housing (2) including a front part (2a) and a rear part (2b), comprising: a flat display panel (1)

having a display area (3), and a fastening part (1a) behind the display area, wherein the flat display panel is fixed to the rear part of the housing with the fastening part at the rear surface of the flat display panel, and wherein the fastening part may be considered as being positioned either in an active region or an inactive region of the display area. Toyoshima fails to show the structural details of the flat display panel and the fastening part.

Yun teaches a flat panel display device (fig. 6) comprising: a flat display panel (a LCD panel 300), a backlight (110), a light guide (130), a reflector plate (140), a first frame (190), and a second frame (400), wherein the flat display panel is between the first frame and the second frame (shown in fig. 6), and wherein the first frame is positioned substantially to the rear of the backlight (shown in fig. 6).

IBM color display teaches the fastening part comprising: a fastening hole and a screw (shown in figure of Back Cover).

Mizutani teaches a flat panel display device (fig. 1A) comprising a flat display panel (1) having a fastening hole (on element 1a) in the rear surface of the flat display panel.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the device of Toyoshima with the flat display panel having a rear frame (or first frame) taught by Yun, the fastening part taught by IBM color display, and the fastening hole in the rear frame taught by Mizutani for revealing the structural details of the flat display panel and the fastening part, since they teach

different portions of a same device, to combine the three teachings would be feasible and reasonable.

DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Omum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 89-95 and 99-103 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 35-46 of U.S. Patent No. 6,501,641 B1. Although the conflicting claims are not identical, they are not patentably distinct from each other because same subject matters claimed in different claims arrangement.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

> (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claims 89-95 and 99-103 are rejected under 35 U.S.C. 103(a) as being unpatentable over Toyoshima (JP 10-117313) in view of Yun et al. (US 5,835,139) and IBM Color Display (IBM 9516-A03).

Toyoshima teaches a flat display panel device (fig. A) mounted to a housing (2) comprising a front housing part (2a) and a rear housing part (2b), the flat display panel device not being fixed to the front housing part (as shown in fig. A), the flat display panel device comprising: a flat display panel (1) having a fastening part (1a) at a rear surface (not labeled) of the flat display panel, the flat display panel being fixed to the housing through the fastening part, wherein the fastening part is behind the flat display panel. Toyoshima fails to show the structural details of the flat display panel and the fastening part.

Yun teaches a flat panel display device (fig. 6) comprising: a first frame (190), a flat display panel (a LCD panel 300), a backlight unit (110), a reflector unit (140) adjacent the first frame, a light source unit (110) adjacent the reflector unit, a light guide unit (130) adjacent the light source unit, a diffuser unit (180), a prism unit (160), and a second frame (400), wherein the flat display panel is between the first frame and the

second frame (shown in fig. 6), and wherein the first frame is positioned substantially to the rear of the backlight (shown in fig. 6).

IBM Color Display teaches the fastening part of a flat display panel device, comprising: a fastening hole and a screw (shown in figure of Back Cover) at each of four corners on the back of a flat display panel, and wherein the flat display panel device shows only the flat display panel and the front frame when viewing from a viewing direction of the flat display panel device (shown in figure on page 3 of Removal and Replacement Procedures of IBM Color Display).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the device of Toyoshima with the flat display panel taught by Yun and the fastening part taught by IBM color display for revealing the structural details of the flat display panel and the fastening part of the flat display panel device, since they teach different portions of a same kind of devices, to combine the three teachings would be feasible and reasonable.

Response to Arguments

5. Applicant's arguments filed 12/14/06 have been fully considered but they are not persuasive.

Regarding double patenting, Applicants request clarification on claims 96-98 being both withdrawn and rejected. Claims 96-98 have been eliminated from double patenting portion in this Office Action.

Regarding rejections of claims 89-95 and 99-103, Applicants argue, 'claims 89-95 and 99-103 are allowable over the cited references in that each of these claims recites a combination of elements including, for example, "a first frame having a fastening part at a rear surface of the first frame wherein the flat panel display is between the first frame and the second frame, the first frame is fixed to the housing through the fastening part, wherein the fastening part is behind the flat panel display." None of the cited references including Toyoshima, Yun and IBM 9516, singly or in combination, teaches or suggests at least this feature of the claimed invention.' Please be advised to read section 4 hereinabove, all the claimed features are taught in the references as stated.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
